The **Sulcabrush** was proven *equal to dental floss* in some parts and *better than dental floss* in other parts of the teeth and gums for the removal of plaque and the reduction of gingivitis.

The **Sulcabrush** is very effective for cleaning around orthodontic bands, crowns, bridges and implants.

Studies performed by:

Columbia University   University at Buffalo   Indiana University  
Schools of Dentistry

# It's Like Flossing, Yet Easier!

For patients who have difficulty flossing!

No strings attached!

Available at:

If the **Sulcabrush** is used daily as directed, it should *help stop the gums from bleeding*. Any bleeding or tenderness which may occur initially, may soon fade as the gum tissues become firm and healthy. (See your Dentist if this persists).

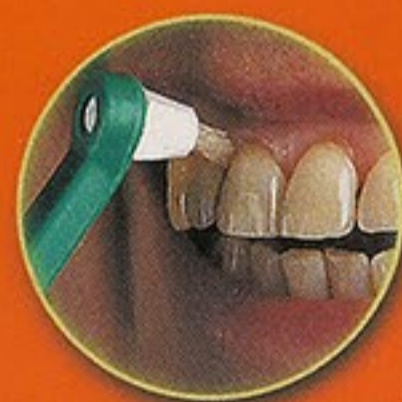

## Get a handle on healthy Gums!

A Canadian Product!

## Stop Bleeding Gums! Remove Plaque!

### Instructions

< 1.  
Place the end marked **outside** on the edge of the gumline. Continuously follow the wavy gumline, adding a circular motion between the teeth.

< 2.  
Continue to apply firm pressure while following the wavy gumline on the **inside** of the mouth, using the end marked inside.

< 3.  
The **inside** angle is also very effective for reaching the gum behind the last tooth.
